

Please replace the Abstract on page 11, lines 1-14, with the following amended Abstract:

ABSTRACT

An anti-theft case (1) is disclosed, particularly for videocassettes, DVD, compact disks, cassette tapes, comprising: ~~[[a]]~~ first and ~~[[a]]~~ second mutually hinged half-cases (3, 5); a ~~separate~~ opening and closing ~~means~~ member (12) and a locking and unlocking ~~means~~ member (18) of the case. In order to ~~optimise~~ optimize assembling and costs of the case (1), the two half-cases (3, 5) are of a same shape and size; the opening and closing ~~means~~ member (12) ~~[[are]]~~ is shaped as an elongated slider and ~~[[are]]~~ is inserted into a seat (20', 20'') obtained in the half-cases (3, 5); and the locking and unlocking ~~means~~ member (18) ~~[[are]]~~ is composed of a cylindrical pin adapted to go in and out of a seat (22) obtained in the opening and closing ~~means~~ member (12).
